

Facilitating change

Realisation of post M&A operational efficiencies

The client's requirements

- Following the acquisition of a major competitor the client needed to:
 - Substantially reduce operational complexity and achieve economies of scale
 - Realise synergies in IT platforms and increase automated processes
 - Identify and protect assets of the combined global entity
 - Improve understanding and visibility and harmonise the use of financial and reserving tools
 - Be more flexible to meet new and changing demands in the market, including future M&As

Our solution

- Provide global leadership and project resource covering Project Management, Claims, Reinsurance, Technical Accounting, IT and Credit Control
- Standardise P&C landscape across multiple locations
- Process mapping
- Identify business issues
- Design solutions
- Manage data migration process and maintain data quality

Value delivered

- Project delivered to plan and within tight project deadlines
